

# Automatic Alu Blister Packing Machine DPP-180L

## Features

- This new series offers faster packaging speeds and higher output compared to the previous model.
- Supports Alu Alu with a thickness of 14mm, while the standard aluminum thickness remains at 12mm.
- Capable of producing up to 236,000 tablets per hour, making it ideal for large pharmaceutical manufacturers.

## Technical Specification

Duraluminum	260	Aluminum-Plastic Depth	12mm-14mm
Main Motor Power	2.2Kw	Capacity (tablets/h)	18,000-236,000 pieces/hour
Gas Requirement	≥0.3m3/min	Adjustable Stroke Range	40~130mm standard machine
Standard Plate Size	80×57mm	Power Supply and Power	380V 50HZ 7.5Kw
Maximum Forming Area	130×250mm	Weight(KG)	1700kg
Punching Efficiency	20-180 plates/min (aluminum-plastic)	Size	3600×720×1650mm
		PVC and PTP Width and Thickness	PVC:270×0.15~0.45mm PTP:270×0.02~0.03mm
