

Automatic Blister Alu PVC Packing Machine DPP-270

Features

- Includes an overload protection system, automatic position detection with alarm shutdown, and automatic fault diagnosis, significantly improving safety during operation.
- Utilizes vibration feeding and precise quantitative control to minimize stirring and friction, ensuring the material's integrity is maintained throughout the packaging process.
- The fully automatic blister packaging machine adopts vibration feeding and quantitative control to reduce stirring and friction and protect the integrity of the material.

Technical Specification

Condition	New	Punch frequency	25-60 times/min
Warranty	1 year	Travel range	40-120mm (optional)
Air pressure	0.4-0.6 mpa	Transport package	wooden case
Main motor power	0.8kw	Production capacity	25 sets per month
Origin	China	Machine weight	1700kg
HS code	8422303090	Specification	4600*650*1700 mm
Noise index	less than 75dba	After-sales service	whole life after -sale service
PVC material (mm)	0.15-0.50*250	Mold cooling	running water or recycle water
PTP alu foil (mm)	0.02-0.035*250	Total power	380V 50hz 5.7kw (customized available)
Dialysis paper (mm)	50-100g*250
