

# Automatic Tube Filling Machine

## Features

- Compatible with various tube materials, including those made of PP and aluminum.
- Suitable for filling a wide range of products, including cosmetics medicines, toothpaste, and soft foods.
- Handles 12 automated processes, including tube feeding, eye-marking tube cleaning, sealing, and printing, ensuring efficient and reliable operation.
- Equipped with a German PLC controller and an intelligent touch screen for programmable control, allowing for the seamless automation of filling sealing, and date printing processes.

## Technical Specification

Structure	Rotary	Filling Accuracy	Plusmn;1%
Packaging Material	Plastic+Alu	Transport Package	Wooden Box
Tube Diameter	5mm-60mm	Specification	1000kg
Tube Length	50-300mm (Customizable)	Product Capacity (PCS/Min)	30-60 0.1m3/Min
Filling Volume	5-250ml/Piece (Adjustable)	Packaging Container Lifting Structure	Pneumatic Lifting
