

# Blister Packaging Production Line

Leaflet material	50-70g/m	Max Forming area and depth	480x160x25mm
Carton Material	250-350g/m <sup>2</sup>	Leaflet Size	(100-200) x (100-150) mm
Air Compressor	0.6-0.8Mpa ≥ 0.8m/min	Carton size	(70-200) x (25-100) x (14-80) mm
Power	380V,50Hz,16Kw	Max Output	180cartons/min ≤ 800bottles/min
Weight	7500kg		

## Features

- Our production lines accommodate various materials, including PVC, PP, and aluminum blister packaging.
- We offer a range of blister lines with pricing options that span from semi-automatic to fully automatic solutions, catering to diverse customer needs.
- We showcase our innovations annually at the Pharmaceutical Machinery Exhibition, staying at the forefront of industry trends. We allocate \$1 million to a dedicated development budget.
