

Pharmaceutical Vial Filling Machine

Features

- Capable of filling up to 120 vials per minute, with a maximum capacity of 180 vials per minute for high-efficiency production.
- Equipped with a safety clutch mechanism to prevent vial breakage ensuring smooth guidance of vials to the bottom of the filling nozzle.
- The machine is made of durable stainless steel, with liquid contact components crafted from SS 316 stainless steel, ensuring high corrosion resistance and hygiene.

Technical Specification

| | | | |
|----------------------|--------------------|-------------------|---------------------------------|
| Punch Frequency | ±0.5% | Power supply | AC220V 50/60Hz 1500W |
| Air Pressure | 0.4-0.6 Mpa | Main machine size | 2300×915×1354 (mm) |
| Size of host machine | 2600 (Optional) | Filling range | 0~2ml /1~5ml / 2~10ml/5~20ml |
| Production speed | 150-250 bottle/min | | |
