

Powder Blender Machine

Features

- Delivers exceptional mixing uniformity, even with materials of varying sizes, humidity levels, softness, and particle types.
- All parts in contact with materials are made of imported stainless steel meeting GMP standards for quality and safety.
- Ideal for use in industries such as pharmaceuticals and chemicals particularly for dry blending processes.

Technical Specification

Core component warranty period	1 Year
Core Components	Motor
Voltage	220V / 380V
Material	304 stainless steel
Mixing Capacity	150- 400kg s/time
Weight(KG)	500kg
Dimensions(W x H x L)	1500*1000*1400mm
Applicable Industries	Production workshop, food and beverage processing plant
