

# Semi Auto Capsule Filling Machine

## Features

- Power-assisted feeding technology eliminates micro-pellet capsule metering errors caused by electrostatic adsorption.
- Optional powder accessories enable the machine to fill both powders and granules, providing double functionality in one unit.
- The semi-automatic capsule filling machine, equipped with patented technology, allows for adjustment of the capsule filling volume without stopping the machine.

## Technical Specification

Change Molds Time	5-10 minutes
Production Rate	10,000-25,000 capsules/hour
Filling Type	micro-pills, powders, granules
Total Power	4.0kw
Air Pressure	0.03m <sup>3</sup> /min 0.7Mpa
Vacuum Pump Suction Rate	40m <sup>3</sup> /h
Dimensions	1.14×0.7×1.63 m
Packaging Dimensions	1.65×0.8×1.75 m
Weight	430kg
Applicable Capsules	000#、00L#、00#、OL# 0#、1#、2#、3#、4#
