

Semi Automatic Capsule Filling Machine

Features

- Features a column-based pill positioning design that reduces mold replacement time from 30 minutes to just 5-8 minutes.
- Offers higher efficiency in capsule loading, U-turning, and vacuum separation, ensuring a smooth and precise filling process.
- Combines electrical and pneumatic systems with automatic counting electronics, a programmable logic controller (PLC), and a frequency conversion speed regulator for precise and efficient operation.

Technical Specification

Mould changing time	5-8(mins)
Working capacity	25000-30000(pcs/hour)
Suitable capsule size	#000、#00、#0、#1、#2、#3、#4
Power supply	380V,50HZ,33PH,4.0kW
Compressed air	0.03m ² /min,0.7Mpa
Vacuum Pump	40m ² /h
Overall dimension (LxWxH)	1.14×0.7×1.63m
Machine weight	380kg
