

Soft Gelatin Capsules Machine

Features

- The medicine injection system utilizes an advanced linear driving system, ensuring a charging and filling precision of less than 2%. The machine also features an advanced water cooling system, which prevents air pollution.
- The capsule conveyor belt is made from food-grade materials authorized by the FDA, ensuring it is non-toxic, non-adhesive, and easy to clean.
- Achieves a capsule packaging rate of up to 98%. The lubrication of the gelatin sheet uses minimal oil supply technology, reducing oil consumption. If lubricated with vegetable oil, the capsules produced are free from the need for washing.

Technical Specification

Model	RJWJ-115	RJWJ-120	RJWJ-200
Rotary Speed	0-5rpm	0-6rpm	0-5rpm
Single pillar Volume	0.75-1ml	0.75-1ml	0.75-2ml
Content Uniformity	±1.5%	±1.5%	±2%
Power	6.5KW	7.5KW	7.5KW
Pillarquantity	8	8	12
Weight	1160kg	1200kg	1840kg
Host Size(L x W x H)	1600×1000×1650mm	1600×1000×1650mm	2100×1100×1800mm
