

NJP-2000

Automatic Capsule Filling Machine

Feature

The NJP-2000 Automatic Capsule Filling Machine is marked by intermittent rotary operation and a perforated plate counting system to achieve precise and efficient capsule filling. Its contemporary exterior design and advanced automation contribute to reliable and seamless operation. It would be an ideal selection for capsule producers to

Technical Specification

Model:	NJP-2000
Output	150000 capsules/hour
Machine weight	1650Kg
Machine Dimensions	1175 (+382)mm*1230mm*1955mm
Power Supply	110 or 220VAC, 50 / 60Hz
Motor power	8KW (standard)
Filling Error:	±2.5%-±5%
